

Environmental Sustainability Survey

The Environmental Sustainability Initiative aims to enhance our understanding of the community's environmental concerns and needs by collecting and analyzing data. These insights will be used to identify and address sustainability issues. Machine learning will be employed to understand community sentiments and predict specific parameters.

Thank you for taking time to participate in this survey!

Personal Information: The survey does not collect any personal information.

Data Sharing: Data will not be shared with any third-party entities. It is exclusively intended for data collection and the examination of the relationship between Environmental Demographics and Sustainability Factors.

Outcome: The results of this survey will be presented to the St. Clair College as part of our ongoing academic project and enhance environmental sustainability.

Your participation is voluntary, and you may withdraw at any time without any consequences. By continuing with the survey, you acknowledge your consent to participate in this survey.
